Detailed Office Action

Status of the Claims

Acknowledgement is hereby made of receipt and entry of the amendment filed 18 January, 2005, wherein claims 15-23 were canceled without prejudice or disclaimer and new claims 24-36 submitted.

Allowable Subject Matter

Claims 24-31 and 34-36 appear to be free of the prior art and are allowable.

35 U.S.C. § 112, First Paragraph

The following is a quotation of the first paragraph of 35 U.S.C. § 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 24-31 and 34-36 are rejected under 35 U.S.C. § 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The claims have been amended to recite compositions capable of producing neutralizing antibody responses within an animal against HIV, as well as, compositions capable of inducing mucosal, cellular, and humoral immunity against HIV-1.

The legal considerations that govern enablement determinations pertaining to undue experimentation have been clearly set forth.

Enzo Biochem, Inc., 52 U.S.P.Q.2d 1129 (C.A.F.C. 1999). *In re Wands*, 8 U.S.P.Q.2d 1400 (C.A.F.C. 1988). *Ex parte Forman* 230 U.S.P.Q. 546 (PTO Bd. Pat. App. Int., 1986). The courts concluded that several factual inquiries should be considered when making such assessments including the quantity of experimentation necessary, the amount of direction or guidance presented, the presence or absence of working examples, the nature of the invention, the state of the prior art, the relative skill of those in that art, the predictability or unpredictability of the art and the breadth of the claims. *In re Rainer*, 52 C.C.P.A. 1593, 347 F.2d 574, 146 U.S.P.Q. 218 (1965). The disclosure fails to provide adequate guidance pertaining to a number of these considerations as follows: The state-of-the-art in relation to HIV vaccine development is one of unpredictability. To date, all attempts to induce meaningful immune responses against HIV have failed. This is not surprising considering the following items: (i) a lack of understanding of the correlates of human protection; (ii) a lack of suitable animal models that are predictive of clinical efficacy; (iii) a lack of understanding of which immunogens and formulations should be employed; (iv) the quasispecies nature of HIV infection that leads to immune escape; and (v) the failure of neutralizing antibody assays to accurately predict vaccine success. The disclosure fails to provide any guidance pertaining to these well-documented problems.

Accordingly, when all the aforementioned items are considered in toto, it would clearly require undue experimentation from the skilled artisan to practice the claimed invention.

Finality of Office Action

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 C.F.R. § 1.136(a). **A SHORTENED STATUTORY PERIOD FOR RESPONSE TO THIS FINAL ACTION IS SET**

TO EXPIRE THREE MONTHS FROM THE DATE OF THIS ACTION. IN THE EVENT A FIRST RESPONSE IS FILED WITHIN TWO MONTHS OF THE MAILING DATE OF THIS FINAL ACTION AND THE ADVISORY ACTION IS NOT MAILED UNTIL AFTER THE END OF THE THREE-MONTH SHORTENED STATUTORY PERIOD, THEN THE SHORTENED STATUTORY PERIOD WILL EXPIRE ON THE DATE THE ADVISORY ACTION IS MAILED, AND ANY EXTENSION FEE PURSUANT TO 37 C.F.R. § 1.136(a) WILL BE CALCULATED FROM THE MAILING DATE OF THE ADVISORY ACTION. IN NO EVENT WILL THE STATUTORY PERIOD FOR RESPONSE EXPIRE LATER THAN SIX MONTHS FROM THE DATE OF THIS FINAL ACTION.
